

# Updating the PAC Storage RAID System

1. Please go to [PAC Storage Official Website](#)> Support → Product Documents and click on the “Firmware” tab. Here you can download the Release notes and Firmware for your RAID system.
2. When performing the firmware update, please go to GUI’s **Settings → Update & security → Firmware update**. Click Browse to upload the firmware file you just downloaded. It will take around 30 mins to finish the update process.

**IMPORTANT!** Node by node update function is not supported, please stop all I/O operations before the update.
